Step 2

Debit spread · Defined risk · Expiry 27 Oct

NIFTY Bull Call Spread

ACTION	CONTRACT	PREMIUM
BUY	25,900 CE	182.40
SELL	26,100 CE	86.15

MAX PROFIT **+₹6,743.75**

MAX LOSS **−₹6,256.25**

BREAKEVEN **25,996.25**

NET DEBIT **96.25 × 65**

Why this strategy

1. Your view is mildly bullish, so a spread captures the move without paying for unlimited upside you don't expect.
2. Selling the higher strike cuts the premium paid and slows time decay against you.
3. Max loss stays inside your ₹7,000 limit for 1 lot, decided before entry.
